
Fundraising for Patrik

HELP US BUY MORE TIME!

Time is money and in this case it is even more so. Life expectancy is another unknown variable and however cruel and disheartening this may sound this is the real life situation for Patrik Kocián from České Budějovice.

Patrik suffers from Duchenne muscular dystrophy. This is a progressive muscular disease which shortens one's life expectancy considerably and causes muscular mass loss. In the terminal phase it attacks breathing muscles and the heart itself.

Currently Patrik has completed the phase two of the experimental stem cell treatment, which has increased Patrik's chances to be here with us long enough to receive the effective cure for his illness. The experimental treatment has already proven a success, especially in the liver tests where the disease is most apparent. The syndrome being a very progressive disease, it is a great achievement for it to stagnate and not to progress any further at this stage. Also all tests results are more than satisfactory which raises our hopes.

Therefore the aim of our Fund Raising remains the same. To relieve the emotional, physical and financial strain which the disease puts on Patrik and all those taking care of him and symbolically stop the time.

Thank you very much!

Patrik has an account with the non-profit organization **Život dětem.**
